

ISS Assessment Process

Prepared by: Kelvin Heath, Chief Security Officer Vectra Corporation Ltd 17th October 2013

Vectra Corporation

- Australian owned Security and Compliance company
- 30 years experience with regulatory compliance, information security and technology
- Services include
 - Security and compliance consulting
 - Security Validation Services
 - Managed Security Services
 - Provision of Security Technology
 - Forensic Investigations

:: The Ostrich Approach to Compliance

- Bury your head in the sand
- Just sit on it and see what happens
- Run away and avoid it
- Form a committee and look busy

: Ostriches are Delaying the Inevitable

- auDA ISS Compliance is not optional, it will be necessary to fully comply
- Take the opportunity to use it to improve your business
- A 'best practice' standard providing improved security for *all* information and business systems
- Alignment with and progress toward PCI DSS, ISO27001 and Australian Privacy Act
- Improved understanding and documentation of business processes, applications, data flows etc.
- Reduced likelihood of compromise, reduced impact
- Improved customer confidence

Solution Assessment Procedure

- Complete Self Assessment on auDA Portal
- Initiate the external vulnerability scan on auDA Portal
- Book On-site Assessment with auDA
- Assessor conducts On-site Assessment
- Initial ISS Compliance Report issued
- 3 month Remediation timeframe
- Revalidation of remediated items
- Issue of final ISS Compliance Report

- Web based auDA Compliance Portal
- Answer each question
- Upload evidence where applicable
- Reference section or page number in comments
- Register for external vulnerability scanning

:: On-site Assessment Process

- Vectra Assessor 2 5 days onsite over a 2-3 week timeframe
- Determine the scope of the assessment
 - Logical or physical network segmentation
 - Network diagram
 - Flow of customer domain name registration data
 - Logical / physical devices
- Identify list of system components for sampling
 - Typically 10% of all in scope system components

: On-site Assessment Process

- Validation and confirmation that controls are in place
 - System configuration settings
 - Log files
 - Firewall / Router rule sets
 - Vulnerability scan results
 - Interview of relevant personnel
 - Process review
 - Personnel files

: On-site Assessment Process

- Opportunity to clarify and understand requirements
- Remediation can be undertaken during the onsite assessment
- For periodic activities, if the process is documented and in place, will be assessed as compliant for the first assessment
- Initial ISS Compliance Report delivered

: Remediation

3 month timeframe to remediate non-compliant items

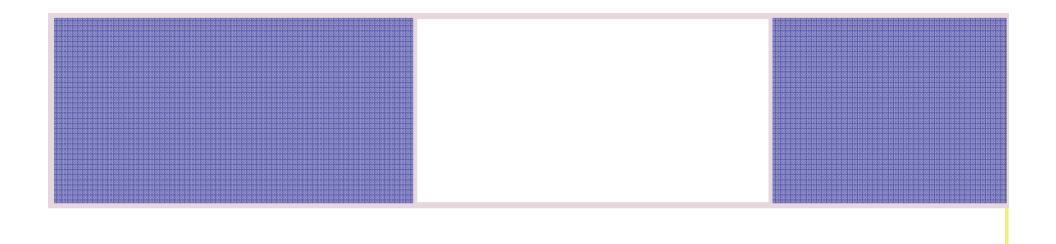

- Consider de-scoping using network segmentation
- Compensating controls will be considered
- Vectra Assessor telephone and email support available
- Evidence can be reviewed as completed
- Final ISS Compliance Report issued after 3 months, or earlier if remediation is completed early

:: Ongoing Improvement

- We welcome comments on the process
- ISS will evolve as threats and risks emerge
- Assessment process will undergo improvement
 - Areas of focus
 - Validation methods
 - Reporting
